

FA25 - COMP 5350/6350 Final Exam Template

Question 1

Instructions: Answer each question below in the (Explicit Answer) section. Provide screenshots supporting your claim in the Supporting Screenshots section for each question. Read the instructions on the Canvas Question **thoroughly**. **MAKE SURE TO RENAME THIS DOCUMENT AND CONVERT TO A PDF BEFORE YOU SUBMIT.** Preview your PDF documents prior to submitting to ensure it is not corrupted.

DON'T chance the format or the order of the sections in the template.

STUDENT-NAME: Blake Senn

Part 1: Chat Log Recovery

Q1: (Explicit Answer): What are the aliases of the suspects mentioned in the chat log?

- Ghost
- Driver
- Fixer
- Techie

Q1: Supporting Screenshots (with annotations/subtitles explaining):

[2023-11-15 | 8:03 PM]

Ghost: Alright, everyone. Focus. We're going over the plan one last time. Everyone clear on their roles?

[2023-11-15 | 8:04 PM]

Driver: Yeah, I've got the van ready. Cleaned and plates swapped. No one's tracing this ride.

[2023-11-15 | 8:05 PM]

Fixer: Good. You better not screw up like last time, Driver.

[2023-11-15 | 8:05 PM]

Driver: That wasn't on me! Ghost said the cops weren't gonna show. Guess what? They did.

[2023-11-15 | 8:06 PM]

Ghost: Enough. We can't afford to bicker right now. Focus. Techie, what's the status on the security systems?

[2023-11-15 | 8:07 PM]

Techie: Relax, Ghost. I've already tested the backdoor. Once we're in, I'll disable the alarms for a 15-minute window. No more, no less.

Ghost, Driver, Fixer, and Techie were the four aliases used in this chat log.

Q2: (Explicit Answer): What roles have the suspects assigned to themselves for the operation?

- Ghost: The Leader/Planner
- Driver: Getaway Driver
- Techie: Security Specialist/Hacker
- Fixer: Responsible for handling contingencies and hiding digital evidence

Q2: Supporting Screenshots (with annotations/subtitles explaining):

[2023-11-15 | 8:04 PM]

Driver: Yeah, I've got the van ready. Cleaned and plates swapped. No one's tracing this ride.

[2023-11-15 | 8:05 PM]

Fixer: Good. You better not screw up like last time, Driver.

[2023-11-15 | 8:05 PM]

Driver: That wasn't on me! Ghost said the cops weren't gonna show. Guess what? They did.

[2023-11-15 | 8:06 PM]

Ghost: Enough. We can't afford to bicker right now. Focus. Techie, what's the status on the security systems?

[2023-11-15 | 8:07 PM]

Techie: Relax, Ghost. I've already tested the backdoor. Once we're in, I'll disable the alarms for a 15-minute window. No more, no less.

Driver prepares the van for the job, and Techie is testing the security system for the job.

[2023-11-15 | 8:03 PM]

Ghost: Alright, everyone. Focus. We're going over the plan one last time. Everyone clear on their roles?

Ghost acts as the team leader, making sure everything is under control and everyone is handling their part.

[2023-11-15 | 8:17 PM]

Fixer: One more thing—I'm creating some files for the operation. A set of headshots of all known "friends", labeled with their IDs as the file names. The extensions will be removed or replaced, so no one will suspect they're real files.

Fixer is hiding digital evidence to cover the team up.

Q3: (Explicit Answer): What specific tasks or objectives are outlined in the chat?

- Driver prepares the van for the job. He swaps the license plates and cleans the vehicle.
- Techie tests a backdoor in the security system. He plans to cut off the alarms for 15 minutes once they are inside.
- The team plans to be picked up by Driver at 8:30 PM.

- Fixer is in charge of cleanup if anything goes wrong, saying he has a bag packed which may indicate he has a gun.
- Ghost has the disguises handled so there is anonymous identity for the team
- Fixer is also tasked with hiding headshots of associates by changing file extensions and encrypting a log file with aliases. He uses encryption key "Ghost" for the second file.

Q3: Supporting Screenshots (with annotations/subtitles explaining):

[2023-11-15 | 8:03 PM]

Ghost: Alright, everyone. Focus. We're going over the plan one last time. Everyone clear on their roles?

[2023-11-15 | 8:04 PM]

Driver: Yeah, I've got the van ready. Cleaned and plates swapped. No one's tracing this ride.

[2023-11-15 | 8:05 PM]

Fixer: Good. You better not screw up like last time, Driver.

[2023-11-15 | 8:05 PM]

Driver: That wasn't on me! Ghost said the cops weren't gonna show. Guess what? They did.

[2023-11-15 | 8:06 PM]

Ghost: Enough. We can't afford to bicker right now. Focus. Techie, what's the status on the security systems?

[2023-11-15 | 8:07 PM]

Techie: Relax, Ghost. I've already tested the backdoor. Once we're in, I'll disable the alarms for a 15-minute window. No more, no less.

[2023-11-15 | 8:07 PM]

Fixer: 15 minutes? That's cutting it close, don't you think?

Driver cleans the van and swaps the license plate to prepare for the job. Techie tests the security system and lets the team know the alarms will be turned off for 15 minutes during the job, so they must be quick.

[2023-11-15 | 8:09 PM]

Ghost: It's enough. We stick to the schedule. Driver, you're picking up the team at 8:30 sharp. Fixer, you've got cleanup if anything goes wrong.

[2023-11-15 | 8:10 PM]

Fixer: Already packed. Ghost, what about disguises? Last time, someone recognized us.

[2023-11-15 | 8:11 PM]

Ghost: Disguises are handled. No slip-ups this time. Everyone wears theirs—no exceptions.

Driver is picking up the team at 8:30. Fixer is in charge of covering up the teams tracks if anything goes wrong. Ghost has the disguises for the team handled.

[2023-11-15 | 8:17 PM]

Fixer: One more thing—I'm creating some files for the operation. A set of headshots of all known "friends", labeled with their IDs as the file names. The extensions will be removed or replaced, so no one will suspect they're real files.

[2023-11-15 | 8:18 PM]

Ghost: Friends?

[2023-11-15 | 8:18 PM]

Fixer: Yes. Some of my friends with some useful expertise that would be useful if need arise.

[2023-11-15 | 8:18 PM]

Ghost: I see but you are leaving that exposed on the system? Are you trying to get us caught?

[2023-11-15 | 8:18 PM]

Fixer: Relax. Without the proper extensions, the files will just look like junk data. No one will open them without knowing what they are or if they would, they will find scrambled text. The second file is a log with aliases and the friends' details—it will be encrypted and I will use your alias, "Ghost", as the encryption key.

Fixer creates files for the operation that consist of headshots of friends and removes/replaces the extensions so that no one suspects them to be real files. He creates an encryption key for the second file to be "Ghost".

Q4: (Explicit Answer) Are there references to specific files, tools, or locations critical to the operation?:

- A set of images of friends labeled with IDs. The extensions have been removed/replaced to look like junk data.
- A file containing aliases and details, encrypted using the password "Ghost".
- After the job is finished, the team will stash the loot at a warehouse on 5th Avenue.

Q4: Supporting Screenshots (with annotations/subtitles explaining):

[2023-11-15 | 8:17 PM]

Fixer: One more thing—I'm creating some files for the operation. A set of headshots of all known "friends", labeled with their IDs as the file names. The extensions will be removed or replaced, so no one will suspect they're real files.

[2023-11-15 | 8:18 PM]

Ghost: Friends?

[2023-11-15 | 8:18 PM]

Fixer: Yes. Some of my friends with some useful expertise that would be useful if need arise.

[2023-11-15 | 8:18 PM]

Ghost: I see but you are leaving that exposed on the system? Are you trying to get us caught?

[2023-11-15 | 8:18 PM]

Fixer: Relax. Without the proper extensions, the files will just look like junk data. No one will open them without knowing what they are or if they would, they will find scrambled text. The second file is a log with aliases and the friends' details—it will be encrypted and I will use your alias, "Ghost", as the encryption key.

Fixer creates files for the operation that consist of headshots of friends and removes/replaces the extensions so that no one suspects them to be real files. He creates an encryption key for the second file to be "Ghost".

[2023-11-15 | 8:12 PM]

Techie: What about the loot? Where are we stashing it after the job?

[2023-11-15 | 8:13 PM]

Ghost: The warehouse on 5th Ave. It's locked down and off the grid. No one will find it.

Ghost informs the team that after extraction, they will stash the loot at a warehouse on 5th Avenue.

Q5: How does the decision to “go dark” on the communication channel after the meeting impact the forensic investigation?

"Go dark" means the team ceased digital communication on this specific channel immediately before the crime execution. This impacts the investigation by creating a gap in intelligence, meaning there is no real-time data regarding the actual robbery or their movements during the crime itself. The chat log serves only as historical evidence of intent and conspiracy, not a record of the crime's execution.

Q5: Supporting Screenshots (with annotations/subtitles explaining):

[2023-11-15 | 8:20 PM]

Ghost: Alright, meeting at the warehouse, 9 PM sharp. Don't be late. This channel is going dark after tonight.

[2023-11-15 | 8:21 PM]

Driver: Noted.

[2023-11-15 | 8:21 PM]

Techie: See you at 9.

[2023-11-15 | 8:21 PM]

Fixer: Got it. Don't mess up, Driver.

[End of Chat Log]

Ghost declares to the team that the channel is “going dark after tonight.” This chat log is evidence of the actual plan, not the crime committed. The last message was sent at 8:21 PM.

PART 2: File Recovery on the Second Partition

Q1: List the Names of Any Files Recovered in Second Partition:

- BL-1087.txt
- CR-1104.file
- DR-1023.txt
- FI-1037.file
- Friends_Log.zip
- GH-1042.file
- KN-1145

- SH-1001.doc
- SP-1123.txt
- TC-1056.file
- WH-1029.doc

Q1: Supporting Screenshots – Recovery Process (with annotations/subtitles explaining):

	r / r	BL-1087.txt	2024-12-06 03:12:27 (EST)	2024-12-06 03:12:27 (ES
✓	- / r	CR-1104.file	2024-12-06 03:12:27 (EST)	2024-12-06 03:12:31 (ES
	r / r	DR-1023.txt	2024-12-06 03:12:28 (EST)	2024-12-06 03:12:27 (ES
✓	- / r	FI-1037.file	2024-12-06 03:12:28 (EST)	2024-12-06 03:12:31 (ES
	r / r	Friends_Log.zip	2024-12-06 03:12:27 (EST)	2024-12-06 03:12:27 (ES
✓	- / r	GH-1042.file	2024-12-06 03:12:28 (EST)	2024-12-06 03:12:31 (ES

	r / r	SH-1001.doc	2024-12-06 03:12:28 (EST)	2024-12-06 03:12:28 (ES
	r / r	SP-1123.txt	2024-12-06 03:12:28 (EST)	2024-12-06 03:12:28 (ES
	r / r	TC-1056.file	2024-12-06 03:12:28 (EST)	2024-12-06 03:12:28 (ES
	r / r	WH-1209.doc	2024-12-06 03:12:28 (EST)	2024-12-06 03:12:28 (ES

There were 11 files that were recovered in the second partition.

ASCII (display - report) Hex * (display - report) ASCII Strings (display - report) * **Export** * View * [Add Note](#)

File Type: JPEG image data, JFIF standard 1.01, aspect ratio,

D: /WH-1209.doc

Thumbnail: [View Full Size Image](#)

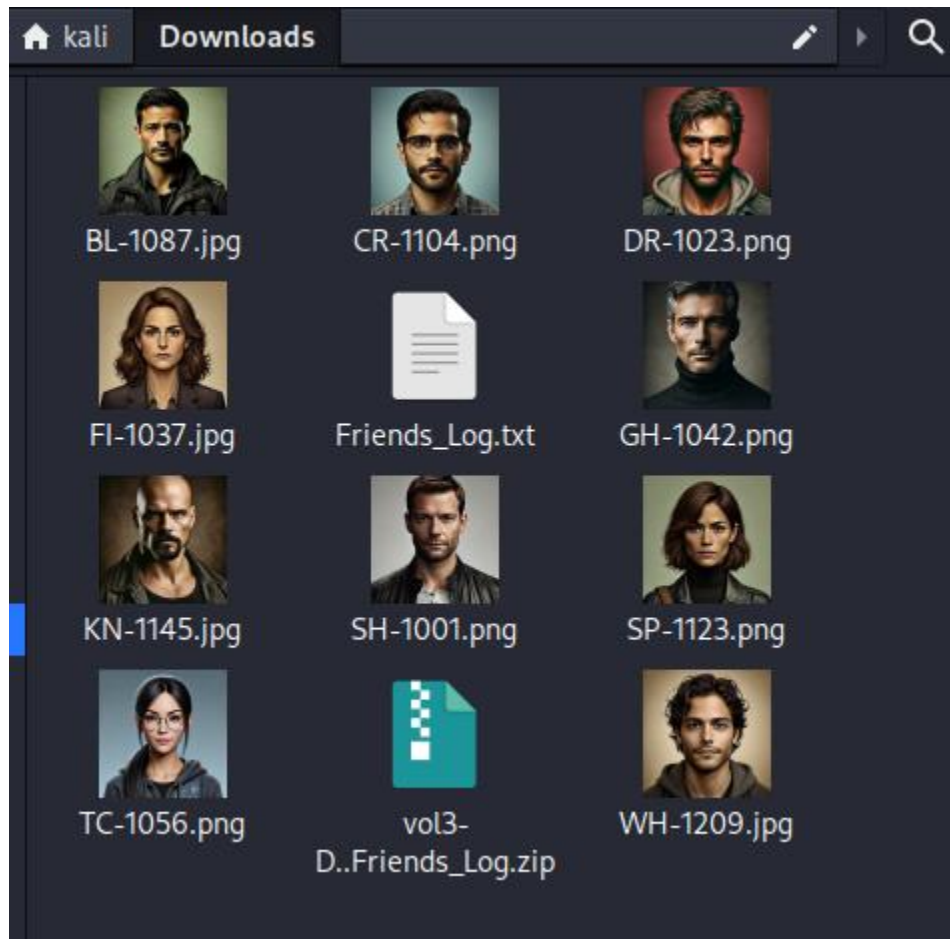

I used the export feature inside of the autopsy to download each of the 11 files.

Q2: For each file from Q1 (Part 2), provide its name and its relevance to the investigation:

- BL-1087.txt (image file) – this file contains an image of the “friend” that has their id
- CR-1104.file (image file) – this file contains an image of the “friend” that has their id
- DR-1023.txt (image file) – this file contains an image of the “friend” that has their id
- FI-1037.file (image file) – this file contains an image of the “friend” that has their id
- Friends_Log.zip (zip file) – this zip file contains a txt file that shows the real identity of the team
- GH-1042.file (image file) – this file contains an image of the “friend” that has their id
- KN-1145 (image file) – this file contains an image of the “friend” that has their id
- SH-1001.doc (image file) – this file contains an image of the “friend” that has their id
- SP-1123.txt (image file) – this file contains an image of the “friend” that has their id
- TC-1056.file (image file) – this file contains an image of the “friend” that has their id
- WH-1029.doc (image file) – this file contains an image of the “friend” that has their id

Q2: Supporting Screenshots:

This screenshot shows the 10 images along with the extracted txt file from the zip file using encryption key “Ghost.”

Q3: Were there any Encrypted/Obfuscated files? If so, list them along with their encryption/obfuscation techniques (If encrypted with passphrase, provide the passphrase), and how you decrypted/obfuscated them.

- BL-1087.jpg (obfuscated) – the file had the incorrect extension to open
- CR-1104.png (obfuscated) – the file had the incorrect extension to open
- DR-1023.png (obfuscated) – the file had the incorrect extension to open
- FI-1037.jpg (obfuscated) – the file had the incorrect extension to open
- Friends_Log.zip (encrypted) – the file had the encryption key “Ghost” to open the zip file, which contained a txt file
- GH-1042.png (obfuscated) – the file had the incorrect extension to open

- KN-1145.jpg (obfuscated) – the file did not have an extension to open
- SH-1001.png (obfuscated) – the file had the incorrect extension to open
- SP-1123.png (obfuscated) – the file had the incorrect extension to open
- TC-1056.png (obfuscated) – the file had the incorrect extension to open
- WH-1029.jpg (obfuscated) – the file had the incorrect extension to open

```

Here, I moved the original file names to the correct corresponding file extension for each file. I also unzipped the Friends_Log and used password “Ghost” to extract Friends_Log.txt.

PART 3: Suspect Identification

Q1: (Explicit Answer): What is the real name of their leader?

- Ghost - Morgan Waves

Q1: Supporting Evidence/Screenshots:

```

78 — Suspect 9 —
79 ID: GH-1042
80 Alias: Ghost
81 Real Name: Morgan Waves |
82 Details:
83   - Known for strategic planning and organizing complex operations.
84   - Expert in stealth and disguise, often leaving no trace of involvement.
85   - Known to work solo but occasionally collaborates on high-profile jobs.
86   - Uses advanced surveillance countermeasures to avoid detection.

```

In the chat log, Ghost was considered the leader. After opening Friends_Log.txt, the file displays Ghost's real name "Morgan Waves."

Q2: Provide a comprehensive list of suspects from the chat log (Fill in the table below):

Add/Insert new rows as needed

Alias	Real name	Suspect ID	Role in the crime
Fixer	Elena Torr	FI-1037	- Highly resourceful and skilled in logistical operations. - Often acts as the "cleaner" for criminal groups, ensuring minimal trace left behind. - Known for her ability to source untraceable tools and equipment.
Driver	Jamie Lopez	DR-1023	- Expert in vehicle modification, evasion tactics, and high-speed driving. - Known to acquire stolen vehicles and alter identification numbers. - Often seen at underground racing events.
Ghost	Morgan Waves	GH-1042	- Known for strategic planning and organizing complex operations. - Expert in stealth and disguise, often leaving no trace of involvement. - Known to work solo but occasionally collaborates on high-profile jobs. - Uses advanced surveillance countermeasures to avoid detection.
Techie	Danielle Wu	TC-1056	- Highly skilled in programming, cryptography, and system exploits. - Believed to maintain offshore accounts to hide profits. - Rumored to sell hacking tools on the dark web.

PART 4: Headshot Recovery

For this Section, you will provide your answers in the following format for each of the headshots:
